

we believe prevention is the best medicine.

WellStar Health System, WellStar Cardiovascular Medicine and Quantum Radiology now offer Heart Screenings at our Douglas and Paulding Imaging Centers. Using a multi-slice CT Scan, a heart screening can help our cardiologists determine your level of risk for heart disease or future cardiac issues.

Screenings are available for \$150 (*price available for a limited time*), and a physician referral is not required. The screening takes less than 30 minutes and requires no special preparation.

Consider scheduling a heart screening, if you have:

- Family history of heart disease
- Diabetes
- History of smoking or tobacco use
- High blood pressure
- High cholesterol

Call 770-956-STAR (7827) for more information.
